SUMMARY

Third-year Information Systems student with hands-on experience taking software projects end-to-end — from gathering business requirements and modeling the underlying data, to implementing and delivering a working system. Comfortable working across the full development lifecycle and collaborating in cross-functional teams to turn business needs into secure, well-structured solutions. Seeking a System Analyst, Business Analyst, or Software Engineer internship to gain hands-on industry experience.

EDUCATION

Ho Chi Minh City University of Science, VNU-HCM
Bachelor's Degree in Information Technology

Expected Graduation: 2027
GPA: 3.64/4.0

TECHNICAL SKILLS

- **Business & System Analysis:** Business Requirement Analysis, System Analysis & Design, Functional Specification, UML, ERD, DFD
- **Database:** Database Design (Relational Modeling), SQL Query Optimization, SQL Concurrency Handling, RBAC, Access Control, Auditing, Oracle VPD & OLS, Oracle Database, SQL Server, MongoDB, PostgreSQL / Supabase
- **Languages:** JavaScript, C++, Python, SQL, HTML/CSS
- **Frameworks/Technologies:** React.js, Node.js, Express.js, Tailwind CSS, shadcn/ui
- **Tools:** Git, VS Code, Visual Studio, Postman, Render, Figma

PROJECTS

SnowVoucher – Online Discount Voucher E-commerce Platform | React.js, Node.js/Express.js, Supabase, Tailwind CSS, JWT | [GitHub](#) | [Live Demo](#) May 2026 - Sep 2026

- Authored business requirement specifications and system design for the Customer subsystem of a 3-subsystem (Admin, Customer, Partner) e-commerce capstone platform, covering voucher search, purchase, and management workflows.
- Designed the platform's relational database (ERD and relational model)
- Built the Customer role end-to-end (React frontend + Express REST API), including OTP email verification, voucher search/browsing, shopping cart, order checkout, and QR-code voucher management, integrating VNPay/PayPal payment gateways and securing endpoints with the team's authentication/authorization middleware, session, and caching layers.
- Merged the frontend and backend into a single deployable service and deployed it to production on Render.

TodoX Application | React.js, Express.js, MongoDB, Tailwind CSS | [GitHub](#) | [Live Demo](#) Jun 2026

- Built RESTful APIs with complete CRUD functionality.
- Implemented task filtering by status and date range using the MongoDB Aggregation Pipeline for optimized queries.
- Designed a responsive interface, resolved CORS issues, and deployed the application on Render.
- Built as a solo project, covering the complete development lifecycle from implementation and testing to deployment.

Hospital Management Security System | C#, WinForms, Oracle Database

[GitHub](#) | [Demo part 1](#) | [Demo part 2](#)

March 2026 – May 2026

- Developed Oracle database security features for a hospital management system.
- This system includes RBAC, VPD, OLS, and auditing mechanisms
- Implemented user and role management functionalities with privilege grant/revoke operations and CRUD processing using stored procedures
- Applied Standard Audit and Fine-Grained Audit for activity logging and access monitoring
- Designed and developed the doctor interface using WinForms and collaborated in a 5-member team environment

File Upload & Download System | Python, PyQt5, MongoDB | [GitHub](#) | [Demo](#)

Jul 2024 – Aug 2024

- Developed a file upload and download system using chunking and hashing techniques
- Designed a desktop GUI using PyQt5 and implemented user authentication with MongoDB
- Built as a solo project with focus on file integrity and efficient data transfer

CERTIFICATIONS

- IELTS Academic | 6.5 Overall

June 2026
