SUMMARY

Third-year Information Systems student skilled in SQL query optimization, Oracle database management, and system analysis and design. Knowledgeable in database security concepts, including access control and auditing, with experience in database design and UI/UX design. Seeking a software engineering or business analysis internship to gain hands-on industry experience.

EDUCATION

Ho Chi Minh City University of Science, VNU-HCM

Bachelor's Degree in Information Technology

Expected Graduation: 2027

GPA: 3.64/4.0

TECHNICAL SKILLS

- **Languages:** C++, Python, SQL, HTML, CSS, JavaScript
- **Database:** Oracle Database, SQL Server, Database Design, SQL Query Optimization, SQL Concurrency Handling
- **System Analysis & Design:** UML, ERD, DFD, Business Requirement Analysis, UI/UX Design, Responsive Design
- **Security:** Oracle Database Security, RBAC, VPD, OLS, Access Control, Auditing
- **Concepts:** OOP, Data Structures & Algorithms, Problem Solving
- **Developer Tools:** Git, Visual Studio Code, Visual Studio, Figma

PROJECTS

Hospital Management Security System | C#, WinForms, Oracle Database

[GitHub](#) | [Demo part 1](#) | [Demo part 2](#)

March 2026 – May 2026

- Developed Oracle database security features for a hospital management system.
- This system includes RBAC, VPD, OLS, and auditing mechanisms
- Implemented user and role management functionalities with privilege grant/revoke operations and CRUD processing using stored procedures
- Applied Standard Audit and Fine-Grained Audit for activity logging and access monitoring
- Designed and developed the doctor interface using WinForms and collaborated in a 5-member team environment

Portfolio Website | HTML, CSS, JavaScript | [GitHub](#) | [Web](#)

Jan 2026 – Mar 2026

- Developed a responsive personal portfolio website using HTML, CSS, and JavaScript
- Designed responsive layouts for multiple screen sizes and deployed using GitHub Pages
- Built as a solo project

Applied Mathematics & Data Analysis | Python, Matplotlib | [GitHub](#)

Aug 2025

- Implemented mathematical algorithms including Gaussian elimination, Gram–Schmidt, and regression models without external libraries
- Applied Markov chains for prediction and state analysis
- Visualized analytical results using Matplotlib for data interpretation

Kitchen God's Journey to Heaven | Unity, C# | [GitHub](#) | [Demo](#) | [Play Game](#)

Apr 2025 – May 2025

- Developed gameplay mechanics including animation, shooting systems, and speed progression
- Contributed to gameplay optimization and player experience improvements
- Collaborated in a 4-member team as Gameplay and Animation Developer

File Upload & Download System | Python, PyQt5, MongoDB | [GitHub](#) | [Demo](#)

Jul 2024 – Aug 2024

- Developed a file upload and download system using chunking and hashing techniques
- Designed a desktop GUI using PyQt5 and implemented user authentication with MongoDB
- Built as a solo project with focus on file integrity and efficient data transfer

CERTIFICATIONS

- IELTS Academic | 6.5 Overall June 2026
- Build Web Pages with HTML and CSS for Beginners – Microsoft | [Credential](#) May 2026
- JavaScript Certification | [Credential](#) June 2026
